United Nations Kenya Sustainable Development Cooperation Framework 2022-2026

- Our new Common Country Analysis (CCA) was finalized and validated with the Government of Kenya, national and international stakeholders on 6 October 2021. It was, in turn, based on a data-driven, granular “Leave No One Behind” Analysis of LNOB risk across Kenya.
- On the same date, the Government and stakeholders also agreed a Roadmap to develop and sign the new United Nations Sustainable Development Cooperation Framework (UNSDCF) by 1 July 2022.
- With three UN Kenya entities – the United Nations Development Programme (UNDP), the United Nations Population Fund (UNFPA) and the United Nations Children’s Fund (UNICEF) – due to submit new Country Programme Documents (CPDs) in 2022, the Resident Coordinator and the three Resident Representatives/Country Directors together ensured that
  - The overall Structure and Results Framework for the new UNSDCF was designed, developed and agreed with the Government of Kenya, national and international stakeholders by January 2022 – the Structure and Results Framework was formally validated by the Government of Kenya (the Permanent Secretaries of
Treasury and Planning, and of Devolution) on 19 January 2022 (with subsequent validation by the Permanent Secretary of Foreign Affairs on 9 February 2022);

- The three CPDs were derived from the UNSDCF Structure and Results Framework as it was emerging through discussion with Government and stakeholders in Autumn 2021. In particular, the CPDs derive from and are fully aligned with the 2 strategic priority pillars and 5 outcomes of the UNSDCF Structure. Once this process was complete, this derivation and alignment was formally confirmed by the Resident Coordinator in letters to the concerned heads of agencies.

- The full UNSDCF – with Programme/Output Layer (developed at a multi-stakeholder workshop from 21-25 February 2022 and still to be validated), a Financing Framework, the Monitoring and Evaluation Framework and the UNCT Configuration Design is on track for signing with the Government of Kenya by 1 July 2022.

KENYA VISION 2030 & MTP IV

UN Kenya Sustainable Development Cooperation Framework

Validated in January 2022 by the Government & partners, the UN Sustainable Development Cooperation Framework aims to help Kenya build forward better after COVID-19 & accelerate achieving Kenya Vision 2030 & the SDGs through priority focus on the “5 SDG Ps” (People, Peace, Prosperity, Planet & Partnership) & those populations & areas most at risk of being left behind.

LNOB Lens

Across all Kenya, cross-cutting
Leave No One Behind lens (SDG Target 10.2):
“By 2026, empower and promote the social, economic and political inclusion of all, irrespective of age, sex, disability, race, ethnicity, origin, religion or economic or other status.”

Particular LNOB emphases: leave no women or girls behind; leave no youth or children behind; leave no one living in the ASALs behind; leave no one living in an informal settlement behind.

Cross-Cutting SDG Accelerators

Transformational Governance
Innovation & Digital Disruption
Managed Devolution
Managed Urbanization
Multi-Dimensional Resilience

Strategic Priority 1
People & Peace
(National & Devolved Governance, Social Protection, Human Capital, Women Empowerment, Youth Empowerment, Children, Equity, Inclusion & Cohesion, Human Rights etc)

Outcome 1.1
By 2026, all people in Kenya at risk of being left behind – particularly all women & girls, all youth & children, all in the informal urban settlements – inhabit an inclusive, enabling, socially cohesive & peaceful environment, while enjoying human rights, trust institutions & participate in transformative governance systems that are gender-responsive, just & rule of law compliant.

Outcome 1.2
By 2026, all people in Kenya at risk of being left behind – particularly all women & girls, all youth & children, all in the ASALs & all in the informal urban settlements – have improved, inclusive & equitable social & protection services.

Strategic Priority 2
Prosperity & Planet
(Inclusive Growth, Green Transition, Natural Resource Management, Biodiversity & Nature-Based Solutions, Agriculture, Nutrition, Food & Livelihoods Security etc)

Outcome 2.1
By 2026, all people in Kenya at risk of being left behind – particularly all women & girls, all youth & children, all in the ASALs & all in the informal urban settlements – benefit from inclusive, sustainable, diversified & environmentally-climate-sensitive quality livelihoods with decent work in the sector economies & realize growth that is resilient, green & equitable.

Outcome 2.2
By 2026, all people in Kenya at risk of being left behind – particularly all women & girls, all youth & children, all in the ASALs & all in the informal urban settlements – have access to & derive benefit from sustainably managed ecosystems for nature-based solutions in a green transition.

Outcome 3.1
By 2026, Kenya’s path to achieving the SDGs benefits from effective multi-stakeholder partnerships to drive a greater amount & diversity of public & private financing & investments that accelerate sustainable development for all people in Kenya at risk of being left behind – particularly all women & girls, all youth & children, all in the ASALs & all in the informal urban settlements.
**UN Kenya SDCF Theory of Change**

**IF**
Kenya can reduce its deep inequalities and lift all at risk of being left behind – particularly all women & girls, all youth & children, all in the ASAL counties & all in the informal urban settlements – out of poverty, and ensure their equitable access to quality services within a peaceful and well-governed society.

**AND IF**
The Kenyan economy becomes an early and successful adapter to the Green Transition, including all at risk of being left behind – particularly all women & girls, all youth & children, all in the ASAL counties & all in the informal urban settlements – while preserving ecosystem services restored and intact.

**THEN**
Kenya as a whole will be transformed and propelled towards the overall realization of the SDGs while leaving no one behind.

**AND IF**
Kenya is able to innovate & maximize the potential of multi-stakeholder partnerships, aligning available financial resources – domestic & international, public & private – to the attainment of the SDGs.
Introduction

1. General Assembly Resolution 72/279 replaces the former generation of United Nations Development Assistance Frameworks with a new tool: the United Nations Sustainable Development Cooperation Framework (UNSDCF). The UNSDCF (or “Cooperation Framework”) is “the most important instrument for planning and implementation of the UN development activities at country level in support of the 2030 Agenda for Sustainable Development (2030 Agenda)”. Going forward, development-focused country programmes of individual UN entities in Kenya will be derived from and aligned to the UNSDCF, not the other way around. This demands a UNSDCF that is strategically focused and visionary, rather than a consolidation of a wide and dispersed array of UN programmatic activities by different UN agencies, funds and programmes.

2. The validated UNSDCF Kenya structure clearly articulates the UN Kenya’s collective response to work with Kenya to address national priorities and gaps in its pathway towards meeting the SDGs. Kenya’s national priorities are the UNSDCF’s “North Star”, as expressed in Vision 2030 and Medium-Term Plan IV. The UNSDCF is a living document over four years and will be reviewed starting end 2022 to ensure the UNSDCF full alignment with the finalized MTP IV and the sustainable development priorities of the incoming government. The structure also embodies the spirit of partnership fundamental for the 2030 Agenda. It has strengthening governance at the core, at national and devolved level. And it is determined to support the Government and people of Kenya to “build forward better and greener” from the COVID-19 Pandemic.

3. The UNSDCF guides the full arc of UN programme planning, implementation, monitoring, reporting and evaluation of UN support on country level for achieving the 2030 Agenda. The UNSDCF further reflects and articulate the contemporary relationship between the Government of Kenya and the UN system’s collective support to achieving the SDGs priorities and gaps, moving from development “assistance” to cooperation and strategic partnership, and from “funding to financing”.

4. The UNSDCF emphasizes United Nations Development System normative commitments. It particularly enshrines the central 2030 Agenda determination to “leave no one behind” (or “LNOB”) at its heart. UN programming under the UNSDCF is required to be people-centred, gender-sensitive, respect human rights and have a particular focus on the poorest, most vulnerable and those furthest behind. It must prioritize integrated and joint programming approaches, addressing core programming principles in a holistic manner, not as add-on modules. These principles are integrated throughout all stages, guiding both process and content. The key principals are: Leaving No One Behind; a Human Rights-Based Approach; Gender Equality and Women’s Empowerment; Resilience; Sustainability and Accountability.

5. The current United Nations Development Assistance Framework (UNDAF) comes to an end in June 2022, at which point the new UNSDCF (in accordance with the joint Roadmap) would be signed to cover a critical stretch of remaining years to achieve the SDGs. On 6 October 2021, UN Kenya and the Government of Kenya jointly launched the Roadmap for the Development of the New Kenya UNSDCF (2022-2026) and validated together the UN Common Country Analysis (CCA). And on 19 January 2022, Government and international partners validated the overall UNSDCF Theory of Change, Structure, Outcomes and Indicators.
The Common Country Analysis (CCA) was, itself, based on a comprehensive and detailed LNOB analysis. This clearly identified the populations and areas of the country most at risk of being left behind in Kenya’s otherwise remarkable sustainable development process – and accordingly, the areas and groups on whom we must place particular emphasis. UN Kenya will use an LNOB lens across all Kenya and to all its work through the UNSDCF. SDG target 10.2 will form the basis of our LNOB lens: “by 2030, empower and promote the social, economic and political inclusion of all, irrespective of age, sex, disability, race, ethnicity, origin, religion or economic or other status”. And additionally, drawing directly from the CCA and LNOB analysis, the UNSDCF will bring a particular (but non-exclusive) emphasis to supporting four groups of the Kenyan population: leave no women or girls behind; leave no youth or children behind; leave no one living in the ASALs behind; leave no one living in an informal settlement behind. These four groups make up the majority of the Kenyan population and share some of the lowest development indicators. Without bringing these groups along Kenya cannot reach the SDGs.

The structure of the UNSDCF revolves around the “five Ps” of the SDGs (People, Peace, Planet, Prosperity and Partnerships) grouped into 2 strategic priorities – People/Peace and Prosperity/Planet – and a third strategic priority as a strategic enabler: Partnerships. As per Agenda 2030, we are all called upon to move away from a classical siloed approach based on thematic compartments. In a siloed approach the five “Ps” would each form a strategic priority area and all actors would nicely fall into these traditional thematic compartments. UN Kenya is determined to not do “more of the same” or “business as usual”. The SDGs are interlinked and to reach them, we must over the next eight years work closely together over thematic or sectoral traditional barriers. To deliver the SDGs, we must challenge ourselves and work within a UNSDCF structure that promotes and also in some ways forces cross-fertilisation.

For “People and Peace”, the linkages in the CCA between delivery of good quality services and addressing inequalities on the one hand with, on the other hand, the work to ensure good governance on both national and devolved levels, enhance national cohesion and prevent conflicts is clear if we aim for transformative change. Equally for “Prosperity and Planet”, the CCA clearly showed the massive opportunity for Kenya to accelerate its green transition. Kenya aspires to be a global leader on environment and innovation and here it is necessary to link the work on economic development such as Kenya’s ambition to transform the value chains of nature-based enterprises including in agriculture, nutrition and food/livelihood security, and affordable and clean energy under “Prosperity” closer together with the work to maintain or restore the ecosystem services of Kenya and adapt and mitigate the climate emergency under “Planet”. Finally, innovative and dynamic multi-stakeholder “Partnerships” are the key strategic enabler and provide the motor for the two strategic priorities. These partnerships will operate through a set of cross-cutting SDG accelerators also identified by the CCA.

UNSDCF implementation will be supported by the development of a strategic, coherent and clear data plan building on a wide range of data sources and in some instances mining the necessary data to accompany the UN Sustainable Development Cooperation Framework and all its indicators disaggregated to track persons/groups at risk of being left behind. With the UNSDCF, UN Kenya will work even more closely together and “deliver as One”, by using UN joint programmes, by better UN coordination at both national and devolved levels and by increased joint UN funding/financing. Furthermore, UN Kenya will also develop a financing framework and resource mobilisation strategy for the UNSDCF aimed at shifting from funding to financing and to private sector investments in the SDGs.
Strategic priority 1: People and Peace

**National development priorities:**

**Regional frameworks:**

**SDGs and Targets:** 5, 10, 11, 16, 17
<table>
<thead>
<tr>
<th>Results</th>
<th>Performance Indicators (disaggregation)</th>
<th>Baseline</th>
<th>Target (Cooperation Framework end)</th>
<th>Data source/MoV</th>
<th>Assumption statement</th>
</tr>
</thead>
</table>

Outcome 1.1 By 2026, people in Kenya at risk of being left behind—particularly all women and girls, all children and youth, all people in the ASAL counties and in informal urban settlements, - inhabit an inclusive, enabling, socially cohesive, and peaceful society where human rights are upheld, and benefit from accountable institutions and participate in transformative governance systems that are gender-responsive and uphold the rule of law.

1. Whether or not legal frameworks are in place, operational and funded to promote, enforce and monitor equality and non-discrimination on the basis of sex:

   - Public allocations for gender equality and women’s empowerment: the government tracking system is being put in place by National Treasury and the Office of the Controller supported by Unicef and UN Women, so data will be available by 2022/2023. (confirmed by UN Women)

   - Level of funding for mandated institutions, eg Kenya National Commission on Human Rights, National Gender and Equality Commission. (Disaggregated data available from Kenya National Bureau of Statistics and from line ministries.)

   - Three, ie full implementation of:
     1. (Constitutional Amendment Bill-Two Third Gender Rule (2011),
     2. Political Parties Act (2011),
     3. Election Act (2011)

   - For funding for gender equality, system will be in place and data readily available 2022/2023 to track GEWE budget allocations (confirmed by UN Women)

   - Parliament of Kenya Hansard

   - Gender Equality and Women Empowerment in Standard Chart of Accounts (SCOA) of National Treasury and Control of Budget Management Information System (COBMIS)

   - Government budget allocations.

   - KNBS reports.

   - Government reports on progress against SDGs

Vulnerability due to political, socio-economic and climate related issues continues to be a pressing factor in the ASALs. Devolution continues to progress and support for it is maintained at national and sub-national levels. GOK continues to translate its commitment to LNOB policies and supports ASAL county governments in undertaking transformative policies for inclusion and good governance.

The spillover effects (in Kenya) of the political and security situation in the region, particularly Ethiopia and Somalia remain limited and contained.

Where legal frameworks and mechanisms are not established to promote, (re)enforce and monitor equality and non-discrimination including on the basis of sex, the UN and development partners will have the space to assist GOK and/or counties.
2. Proportion of the population reporting personally felt discriminated against or harassed within the previous 12 months on the basis of a ground of discrimination prohibited under international human rights law

- 39% reported to police GBV and harmful practices (2020)
- 37% of PLHIV are being discriminated against (2021)
- XX% of complaints investigated or dealt with (tbd).
- 25% of PLHIV are being discriminated against

|------------------------------------------|------------------------|---------------------|---------------------------------------|

| 4. Proportion of county governments reporting improved public finance management processes and systems for equitable, efficient and accountable service delivery. | Baseline: 50% (2021) | Target: 75% (2026) | Data Source: Council of Governors, Office of Auditor General, Office of Controller of Budget, National Treasury and Planning |

| 5. Proportion of population (disaggregated age, sex, demography) subjected to (a) physical violence, (b) psychological | Cases of FGM rose to 139 in 2020 from 74 in 2019, while GBV recorded 3,884 cases in 2020 from 2,189 in 2019. (Economic Survey, 2021 by Kenya National Bureau of Statistics) (National | Reduce the number and % of cases by half | Kenya National Bureau of Statistics, Partners Reports and Data, Media reports |

GOK and County Government demonstrate political will to develop, implement and monitor policies, strategies and frameworks that are gender responsive and accountable. Men and boys are actively engaged in the work for gender equality. Gender sensitivity is mainstreamed by the GOK and County Governments throughout development, planning, implementation and monitoring and evaluation of activities. GOK and County Governments maintain, promote, and establish where needed, systems to track and make public allocations for gender equality and women’s empowerment.

GOK and County Governments reinforce adherence to international human rights law and prohibition of discrimination to continue preventing and countering
violence, (c) sexual violence and (d) human trafficking in the previous 12 months.

The number of GBV cases recorded between January and June 2020 increased with 92.2% compared with those of between January and December 2019 (Draft SDG Gender Factsheet 2021 by UNWOMEN and KNBS)

**Physical violence**

**Children**

12% of females and 11% of males aged 13 to 17 perpetrated physical violence.

13.5% females and 2.4% males aged 13-17 experienced sexual violence.

13.5% females and 2.4% males aged 13-17 experienced sexual violence.

17.3% females and 5% of males experienced emotional violence before the age of 14.

7.7% of female children and 2.3% of male children

The number of GBV cases recorded between January and June 2020 increased with 92.2% compared with those of between January and December 2019 (Draft SDG Gender Factsheet 2021 by UNWOMEN and KNBS)

The Government and UN Agencies will invest in reporting and data management systems in line with existing Data protection legal framework (e.g. Data Protect Act)

With support of partners the Judiciary integrates the informal systems of resolving disputes into the formal criminal justice system to work hand in hand to mitigate on malpractice that contravene the national legal
(aged 15 to 24) experienced multiple types of sexual and physical violence.

**Women**
36.9% of women & girls aged 15 years and older were subjected to physical violence,
13.3% subjected to sexual violence,
32.4% subjected to emotional/psychological violence.

**Men (KDHS 2014)**
40% of men physical violence,
2% subjected to sexual violence

---

### 6. Proportion of the population including displaced population who have experienced a dispute in the past two years and who accessed a formal or informal dispute resolution mechanism, by type of mechanism

<table>
<thead>
<tr>
<th>Mechanism</th>
<th>Proportion</th>
</tr>
</thead>
<tbody>
<tr>
<td>Between 17.2 and 17.9 million Kenyan citizens have experienced one or more legal problems in the past four years (2017). Almost two out of three adult Kenyans (63%) 2017 have encountered a situation in which an accessible, affordable and fair justice process is needed.</td>
<td>Reduce by half the number of people who encounter legal problems</td>
</tr>
</tbody>
</table>

**KNBS Kenya Integrated Household Budget Survey 2015/16, Justice Needs and Satisfaction in Kenya 2017 by HiIL, research supported Judiciary and World Bank KIHBS**

With support of partners Judiciary place special attention on the most vulnerable: provide affordable and accessible justice journeys for all

With support of partners Judiciary intensifies consistent and thorough data collection: ensure accountability and focus on the users of justice

GOK and County Government continue to align national and county level formal and informal dispute resolution mechanisms, and continue to promote the contextualization of the mechanisms, in order for proportion of population to access resolution mechanisms.

Demographic dividend risks becoming a demographic disaster, with large numbers of unemployed, disillusioned and unemployable youth.
GOK and County Government continue to be committed to establishing, supporting, and being accountable to further develop, decision-making to be inclusive and responsive without discrimination.

Violations of human rights in countering criminality and violent extremism attacks, especially in North-eastern counties of Kenya, hamper realization of results. Similarly, pressure on civil society and media will undermine oversight and accountability mechanisms. There is need for strengthened fiduciary management, particularly at decentralized levels.

High levels of corruption and a lack of accountability and transparency hinders economic growth and further contributes to social alienation. Disparities and exclusion can also breed violent extremism.
National development priorities:
Constitution of COK-Chapter 2 on National values - human dignity, equity, social justice, inclusiveness, equality, human rights, non-discrimination and protection of the marginalized; Chapter 4 article r 21-28 on Bill of Rights and Article 43 & 53 – on economic social rights.
Vision 2030-The social pillar- aims to improve the quality of life for all Kenyans by targeting a cross-section of human and social welfare projects and programmes, Frontier Counties Development Council FCDC- strategy –serves as a catalyst in promoting, integrating & sustaining peace & socio-economic development (status tbc)

**National development priorities:**
Vision 2030 Pillars, MTP III and MTP IV.

**Regional frameworks:** AU Agenda 2063 Aspiration 1 (10,11,12,13) Aspiration 6 (47, 48) Aspiration 7 (59, 60, 63)

**SDGs and Targets:** SDG 5, 10, 17
| Outcome 3.1: By 2026, Kenya’s path to achieving SDGs benefits from effective multiple stakeholder partnerships to drive a greater amount and diversity of public, private and community collaboration as well as financing and investments that accelerate sustainable development for people in Kenya at risk of being left behind particularly in the ASAL counties, informal urban settlements, all women and girls, and all children and youth. |
|---|---|---|
| 1. Foreign direct investments (FDI), official development assistance and South-South Cooperation as a proportion of total domestic budget that benefit people in Kenya at risk of being left behind particularly in the ASAL counties, informal urban settlements, all women and girls, and all children and youth. | 2019 5.3% | Economic Survey |
| 2. Number of productive multi-stakeholder partnerships in Kenya supporting crosscutting SDG accelerators and the achievement of the SDGs including through financial and non-financial resources that benefit people at risk of being left behind particularly in the ASAL counties, informal urban settlements, women and girls, children and youth. | 7.3% | New government policies are aligned with the SDGs. Impact of pandemics, climate change & disasters is well mitigated. Well managed elections and smooth transition of power. The political and economic environment will remain stable within the region. Stability of the global & regional economy. Favourable environment for partnerships is maintained with the new government. Effective leadership of multi-stakeholder partnerships. Partnerships constitute whole society and whole of government. |

*Survey to reflect on:
   a. Number of partnerships
   b. Level of trust and commitment among partners on the shared vision
   c. Rating of coordination roles and responsibilities undertaken by governance and management
   d. Level of satisfaction with the overall partnerships
   e. Partnerships initiatives pipeline & diversity of partnerships
   f. Financial resources leveraged through partnerships
   g. How many of these partnerships are supporting LNOB agenda*

Private resources allocated to LNOBs to be assessed by UN.
